PROFESSIONAL EXPERIENCE

FULLSTACK WEB DEVELOPER | JULY 2021 – PRESENT

DATABASIK SOFTWARE PTY LTD

Melbourne, Australia (Remote)

Stack: PHP 7.x – 8.x, Laravel, MySQL, ReactJS/TypeScript, Python

- Led integration of "Reserve With Google" feature, creating endpoints that sync with Google's booking system while ensuring automatic notifications for booking changes
- Collaborated on transitioning Obee's admin portal from PHP to ReactJS/Redux, significantly improving UX and mobile responsiveness
- Developed a Notion-like content editing experience using BlockNote editor with custom components that dynamically fetch backend data
- Engineered Python serverless functions for data extraction and processing that power interactive reporting dashboards
- Maintained and enhanced the overall Obee web application ecosystem using modern architecture patterns

LEAD DEVELOPER | SEPT 2019 – JUNE 2021

MULTI FEEDS LTD

London, United Kingdom (Remote)

Stack: PHP 7.x, Laravel, MySQL, Docker

- Founding development team member for product feed automation service startup
- Architected and built the core feed import/export system supporting nearly 100 different product feeds for platforms like Google Product, Facebook, Criteo, and Tradedoubler
- Developed Shopify/BigCommerce integrations leveraging their APIs to automate product data extraction
- Implemented bulk override capabilities and automated product/category filtering systems
- Designed system architecture to enable easy addition of new feed specifications with minimal configuration

PHP DEVELOPER | OCT 2019 – DEC 2020

BAE SYSTEMS APPLIED INTELLIGENCE/SILVERSKY TECHNOLOGIES SDN BHD

Kuala Lumpur, Malaysia

Stack: PHP 7.x, Symfony 2/3, Oracle DB, Docker, ReactJS

- Core member of 14-person development team maintaining and enhancing the SMC portal for cyber security monitoring
- Operated in 3-week sprint cycles, participating in daily standups and regular code reviews
- Served as scrum master for multiple sprints, managing sprint planning, refinement, reviews, and retrospectives
- Enhanced frontend interface components using ReactJS

SENIOR BACKEND DEVELOPER | MAY 2019 – SEPT 2019

REMARK INTERNATIONAL

Kuala Lumpur, Malaysia

Stack: Ruby On Rails, PostgreSQL, Docker

- Maintained RESTful API for health-focused mobile application integrating with insurance companies' backends
- Collaborated remotely with Netherlands-based development team
- Implemented strict TDD approach resulting in highly automated CI/CD pipeline
- Optimized database queries and API response times

SENIOR WEB DEVELOPER | MAR 2014 – MAY 2019

JAM COMMERCE SDN BHD/POPLOOK.COM

Kuala Lumpur, Malaysia

Stack: PHP 5.6/7.1, MySQL, PrestaShop, CodeIgniter

- Led team of 6 developers, providing mentorship and technical guidance
- Managed sprint planning and execution for Poplook.com and internal projects
- Conducted system analysis and design for new features and module modifications
- Researched and implemented emerging technologies to enhance user experience

LEAD DEVELOPER | MAY 2011 – MARCH 2014

DATAFEEDEXPERTS.COM

London, United Kingdom (Remote)

Stack: PHP 5.6, MySQL, CodeIgniter

- Maintained and enhanced product data import/export platform for customized feed generation
- Developed new processes to accommodate changing requirements from various marketing engines
- Managed technical support team and monitored SLA compliance
- Administered offsite IT infrastructure including web servers, email services, and databases

EARLIER EXPERIENCE
